

Volunteers Needed for Signal Mountain Stream Teams!

What's in my stream? Can my kids play safely in that stream? Where can I find the best crawdads? Those questions and more will be answered at our next Volunteer Water Monitor Training day at Signal Mountain Town Hall, Saturday, November 16th at 10 a.m. TenneSEA Clean Water Project will lead the training along with officials from the Town of Signal Mountain. Everyone will learn about our streams as well as how to take samples and if you want, even how to do the chemical and bacterial tests! We are searching to expand our Signal Mountain Stream Teams so we can have more folks keeping an eye on all our streams. TDEC, Town of Signal and all of our water regulators can use our help. They cannot be at our streams all the time. So don't YOU want to know what's going on in your back yard? Together we can better protect our water resources.....so we can find MORE crawdads in our streams!
